SUBSTANCE ABUSE TREATMENT FACT SHEET

Massachusetts Department of Public Health, Bureau of Substance Abuse Services February, 2002

This fact sheet contains information about the impact of alcohol and other drug use in the Fourteenth Middlesex Representative District. Admission data were reported to the Bureau of Substance Abuse Services (BSAS) Substance Abuse Management Information System in FY 2001.

Residents of Fourteenth Middlesex Representative District

Treatment Admissions:

In FY 2001, there were 120,687 admissions to licensed substance abuse treatment services in all of Massachusetts. Of these, 0.2% (204) reside in the Fourteenth Middlesex Representative District. Due to budget cuts in FY 2002, BSAS estimates that 19% (38) of Fourteenth Middlesex Representative District residents will not be able to access treatment services. Please note that these statistics represent only individual admissions, and represent a figure lower than the actual number of constituents in need of treatment services.

- In FY 2001, 80% of admissions from the Fourteenth Middlesex Representative District were male and 20% were female.
- Over 48.1% of admissions were between the ages of 21-39.
- 85.9% of admissions were white non-Latino, 2.1% were black non-Latino, 7% were Latino, and 1.6% were Asian and 3.2% were other racial categories.
- 63.2% of those admitted to treatment were never married, 19.4% were married, and 10.2% reported not to be married now.
- 17.8% of admissions had less than high school education, 36.7% completed high school, and 45.4% had more than high school education.
- 56.7% of those admitted to treatment were employed.
- 9.7% of admissions had prior mental health treatment.

Substances Used in Past Year:

Upon entering treatment, each client is asked to report ALL substances used in the past year (12 months) prior to admission. Admissions frequently report using more than one substance within the year. The use of more than one psychoactive substance, such as alcohol and marijuana, is referred to as 'polydrug' or 'polysubstance' use. For example, individuals who use cocaine, crack and heroin also may report the use of either alcohol and/or marijuana.

• Table 1 shows ALL substances which clients reported using in the year prior to admission, including the prevalence of injection drug use (IDU) in the Fourteenth Middlesex Representative District. Injection drug users (or IDU's) are individuals who use a needle to ingest cocaine, crack, heroin or another drug to get high.

Table 1 Annual Admissions by Substance Used FY 1995 – FY 2001										
Fourteenth Middlesex Representative District Total Alcohol Marijuana Cocaine Crack Heroin IDU										
FY '95	219	196	60	38	27	27	20			
FY '96	220	195	78	27	18	19	12			
FY '97	211	189	69	23	18	15	14			
FY '98	214	187	76	30	0	21	16			
FY '99	241	204	77	40	24	36	28			
FY '00	223	193	80	33	15	26	19			
FY '01	204	162	65	20	13	31	25			

- Since FY 1995, residents of Fourteenth Middlesex Representative District reported a leveling off in cocaine and crack use, but an increase in heroin use.
- Between FY 1995 and FY 2001, admissions reporting alcohol use decreased by 17%, while marijuana use increased by 8%.

Primary Substance of Use:

At admission clients also identify a "primary drug" of use which is the substance currently causing them the most problems.

• Table 2 compares the proportional distribution of primary drugs in Massachusetts with that for the Fourteenth Middlesex Representative District.

Table 2									
Primary Drug by District and State FY 2001									
	Alcohol	Heroin	Marijuana	Cocaine	Crack				
District	64.8%	13.5%	15.6%	1.0%	0.5%				
State	46.4%	35.9%	6.5%	3.8%	3.4%				

• While heroin, cocaine and crack as a primary drug of use in your Representative District was lower than the State average, alcohol and marijuana was higher within your District.
